Ground Zero is the **first urban craft brewery in Romania.**

We brought to the table **the first Romanian IPA – Morning Glory, and the first Double IPA – Imperial Fuck**, beers recognized and appreciated for their quality by the most prestigious publication in the craft beer industry, **All About Beer**, starting back in 2015.

With a permanent lineup of 6 Ale style beers, **Ground Zero placed Romania on the international craft beer map.**

We use the best ingredients in the world we can get our hands on:

- **live yeasts**, multiple international medal-winners, which we bring by plane, on ice;
- **top-quality barley malt** brought from Great Britain from a partner with tradition and responsibility for the industry;
- **super-premium hops** from the USA, cultivated by farmers with over 150 years of experience, who constantly innovate and raise market standards.

We are now producing in our 3rd brewery built from scratch. We introduced in the local market over 50 beer styles under our own name or through collaborations with international and local producers. The production capacity has increased from 3,000 liters/month to over 50,000 liters/month, ensuring consistent stock availability, accommodating special projects such as the **XperimentALE** line, gypsy brewers, or private-label recipes.

XPERIMENTALE

We developed the XperimentALE beer segment through which we introduce new products to the market, brewed just once. We love challenging ourselves with these projects, developing new tastes and aromas, new beer styles, to surpass our latest recipe and spark the interest of even the most demanding customer.

GROUND ZERO MISSION / UNTYING MINDS!

We want to create a small, independent, yet very cool craft beer. A beer that challenges your comfort zone and unties your mind. We provide people with the means through which we discovered ourselves, encouraging them in turn to discover (themselves).
